Projects

HIGH STREET GYM

A full stack website for High Street Gym where members can book their workout classes and manage them effortlessly. Additionally, members can share their fitness journey with others using the blog function. The platform offers a seamless sign-up and login/logout process for a convenient user experience.

Skills : HTML, CSS, DaisyUI, Tailwind React , Node JS, MySQL, AWS

Weather app

Developed a user-friendly weather application that utilizes external weather APIs to provide detailed weather data for any city. Users can search for their desired location and access real-time weather information, including current conditions and forecasts for the next 13 hours.

Skills : React, TypeScript, Tailwind

Today I learned

Today I Learned is a project where users share and discover new facts. Users can submit facts they've just learned, which are stored for others to see. They can also vote on facts they find interesting, helping the best ones stand out. It's a fun way for people to learn and share knowledge together in a friendly community environment.

Skills : HTML, CSS, React, SupaBase
